

Variable Angle Notching Machine BOSCHERT System

VARI-IV™.

4 mm (.157") mild steel
3 mm (.118") stainless
steel

Special Features:

- Perfect unit for thin and thick material.
- Extremely good price-performance relationship
- Fast cost pay-back, even with low utilization
- Technical proved variable angle **Boschert System**.
- The very simple, fast and precise handling of the machine is a pleasure.
- Economic drive system that has been tested million of times
- **Boschert** blades love the notching of stainless steel.
- Maintenance free system
- **Boschert** offers a one-year warranty on the blades
- Flat, safe table surface without any openings
- Excellent precision table stops
- **Boschert** variable angle notching – a typical German quality product.

BOSCHERT

Some more Features of the VARI-IV:

- The workman knows that sometimes there is a need to notch into a 90° angle. **Boschert** allows to notch directly into the bend.
- Clear view on the blade's trip
- All angles from 30° to 120° without changing the blades or clearance.
