# SAMPLE SHEET CATALOG

# SAMPLE SHEET CATALOG

## NOT POSSIBLE? YET POSSIBLE!

Be it form/blanking, Cluster or Embossing tool, be it form tool, marking, thread rolling or Knock-out Tool, there is nothing that does not exist in punching.

We try to make every wish of our customers possible. In this process, the expertise of the various departments will be bundled on a company-wide basis in order to find the ideal solution for the customer's special requirements.

Following strength calculations, all special tools are submitted to a test run on one of the three machines assigned to this purpose. They are then labeled for documentation and control with a sample sheet.

Furthermore, customers receive help in programming the tools on their machine.

WE DO OUR UTMOST TO GET YOUR SHEET METAL INTO SHAPE.
